

## precote 19-2

### Clamp Coating for Threads

#### Description

---

precote 19-2 is a nonreactive coating that offers immediate clamping of cylindrical threads. The coating is dry, tack-free, with good adherence and can be used in all kind of assembly procedures.

#### Application

---

precote 19-2 is used as a coating for assembly components e.g., screws and studs in cylindrical/cylindrical pairing, where controlled and high initial installation torque for adjustment is needed. Furthermore precote 19-2 can be used as securing device against the loosening through vibration or for transportation.

#### Properties

---

- Clamping immediately after assembly.
- Constant assembly properties.
- Dry to the touch coating.
- Can be applied to metallic and non metallic surfaces.
- Good chemical resistance.
- Partially reusable.
- Non hazardous.
